

INTRODUCTION

Padgett Instruments by Integra Miltex is a partnership of two very respected names in surgical instrumentation. These classic brands provide a combination of choice and quality unmatched by any other instrument company.

The Padgett and Integra Miltex names are synonymous with premium surgical instrumentation manufactured from the highest quality stainless steel by skilled German craftsmen to exacting specifications. The surgical “feel” of our instruments, the superb cutting ability, the smoothly beveled box locks and jaw edges which protect suture material from snags or cutting are just a few features that differentiate and make our products outperform and stand-out from the competition.

This catalog presents a comprehensive offering of premium SuperCut and Tungsten Carbide instruments as well as forceps, rasps, retractors, dissectors, fiber optic and other specialty instrument patterns. Our instrument selection recognizes and meets the variety of clinical needs for all specialties including Plastic Surgery, Dermatology, General Surgery, ENT, Ophthalmology and many more.

General Information:

Surgical instruments shown in this catalog are made of high quality surgical grade stainless steel, unless otherwise noted.

Illustrations and content provide general description only and may be subject to change.

Some products in this catalog may not be available for sale in the European Union.
